

User Policies: Image Reconstruction Computer

This Image Reconstruction Computer (Windows OS) is used for image reconstruction and data processing purpose only by Imaging Facility users. Users can process image/data collected by TEMs, FIB-SEM and Raman microscope. Please contact facility staff for approval if you have any other data processing/storage related requests. There are policies that everyone need to follow:

1. Please use "ASRC Imaging" as the user account when logging in Windows.
2. No reservation needed, first come and first use.
3. When running image reconstruction or data analyzing process and you need to leave temporality, please put a note including your name and contact information as well as expected back time. Other users or facility staff might terminate any unintended work if no note was left.
4. Users are responsible for their images and data. The facility is not responsible for any unsaved work or lost data.
5. Remotely control such as Teamviewer is generally not allowed to users. If you have such a request, please contact facility staff for a one-time use approval.
