

Aaron Hall, PhD
Founder and CEO | Intropic Materials

Session 4: Functional Materials and Smart Buildings

Title of talk: Chaotic Good: The design of high performance materials through the leveraging of diversity and controlled randomness

Bio: Dr. Aaron Hall is the founder and CEO of Intropic Materials where he is currently working to solve the plastic waste problem from the inside out. Hall leverages his diverse set of professional experiences in consumer packaged goods R&D, consulting, and financial management and strategy to guide his work. Hall earned his Ph.D. in materials science and engineering from UC Berkeley, where he led the design and development of the novel enzyme stabilizing polymers at the core of Intropic, and a B.S. in chemistry from UC Santa Cruz. A Bay Area native and avid cook, Hall draws inspiration from the innovation culture and waste-not ethos of the kitchen.
