

SPRING 2024 NEUROSCIENCE SEMINAR SERIES

FEBRUARY 01

MANUEL SPITSCHAN, PHD

Assistant Professor of Chronobiology & Health
Technical University of Munich

"What does the eye tell the clock? Mechanisms underlying the impact of light on physiology and behavior."

FEBRUARY 08

PEGAH KHOSRAVI, PHD

Assistant Professor of Biomedical AI
City Tech - CUNY

"MIND AI Nexus at ASRC: Harmonizing AI with Multidisciplinary Research for a Collaborative Future."

MARCH 07

TERRI WOOD, PHD

Professor, Pharmacology, Physiology & Neuroscience
New Jersey Medical School, Rutgers University

"Location, Location, Location: CNS Heterogeneity in Oligodendroglia, Myelin and Cholesterol."

APRIL 11

JAMY PENG, PHD

Associate Member, Department of Developmental Neurobiology
St. Jude Children's Research Hospital

"Opposing regulation of histone H3 lysine 27 modifications programs neural stem cells division, death, and differentiation."

MAY 02

JAMES P. CURLEY, PHD

Associate Professor, Psychology Department
University of Texas at Austin

"Unraveling the Behavioral Complexity of Social Dominance Hierarchies in Mice."

JUNE 06

DEBORAH CORY-SLECHTA, PHD

Professor of Environmental Medicine
University of Rochester Medical Center

"Ambient Ultrafine Particle Air Pollution as an Etiological Risk Factor for Neurodevelopmental Disorders."
