Before a device may be used you must Enable it in Badger. Most equipment has a physical interlock which will prevent some key component from functioning unless the device is enabled in Badger. Unless instructed to do so by staff a member should never enable equipment for use by other members! Members must be "qualified" by lab staff prior to having the ability to enable a device. When you have been qualified by staff it may take a few minutes before the qualification propagates out to the system. You may need to log off and back on to get any new qualifications. Charges accrue from the moment a device is enabled and continue until the device is disabled.

Enable a Device -
